Contents

1 View user's profile	1
2 View Recommended Users to Follow	2
3 Link Account to External Music Streaming Platform	2

1 View user's profile

Feature: View User's Profile

Scenario: View own user's profile

Checking out one's own profile should easily let them see of their activity

Given I have chosen to view a user's profile
When that account is my account
Then I see my imported music A
And I see my rated entries
And I see my shared Music B
And I see a list of the people follow me
And I see a list list of the people I follow back

Scenario: View another user's profile

Checking out a different user's account should include a follow/unfollow button.

Given I have chosen to view a user's profile
When that account is not my account
Then I see their imported music A
And I see their rated entries

And I see their shared Music B
And I see a list of the people that follow them
And I see a list of the people they follow
And I have the option to with follow/unfollow that user

2 View Recommended Users to Follow

Feature: View Recommended Users to Follow

Scenario: Standard run

Heading to the related page a user should be presented with a complete list of nearby users with

When I choose to view the list of recommended users to follow
Then I see a list of nearby users with similar taste
And I see their full name
And I see their profile photo
And I see our common followers
And I have the option to follow/unfollow

3 Link Account to External Music Streaming Platform

Feature: Link Account to External Music Streaming Platform

Scenario: Successful run

A user should be able to log in to the music streaming service of their choice, should that be

Given that service is in the list of supported music streaming services
And there is no error in the verification process
When I select a music streaming service to log in to
Then I should be referred to that service for external sign in
And that platform, along with my account on it should be added to my profile information

Scenario: Unsuccessful run / Abort

A user unable to log in externally to a music platform should be redirected to the platform self

Given that service is in the list of supported music streaming services
And there is an error in the verification process

When I select a music streaming service to log in to
Then I should be alerted of an error in the verification process
And I should be redirected to the prompt to choose a music streaming service to log in
